SUMMARY

Motivated B.Tech CSE (AI/ML) graduate aspiring to build a career in DevOps and Cloud Engineering. Passionate about automation, CI/CD pipelines, containerization, and cloud infrastructure. Seeking an entry-level DevOps Engineer role to apply my knowledge of Docker, Kubernetes, Linux, and AWS in real- world projects.

PROJECTS

Dockerized Java Application Deployment

- Containerized a Java Spring Boot application using Docker.
- Created a Dockerfile to build and run the application.
- Used Docker Compose for multi-container setup.
- Optimized image size using multi-stage builds.

CI/CD Pipeline using Jenkins

- Installed and configured Jenkins on Linux server.
- Built CI/CD pipeline to automate build and deployment.
- Integrated GitHub with Jenkins for automatic triggers.
- Deployed application to Docker container after successful build.

Kubernetes Deployment on AWS

- Launched EC2 instance and installed Kubernetes cluster (Minikube/Kubeadm).
- Deployed containerized app using Kubernetes Deployment & Service YAML files.
- Managed scaling using ReplicaSets.

EDUCATION

B.Tech, Computer Science And Engineering in Ai ml
Samskruti College of Engineering and Technology, Ghatkesar, Hyderabad

Sep 2022 - Apr 2026

GPA: 6.54

Pre-University Education ,

Vikas Junior College, Narasaraopet, Andhra Pradesh

Jun 2019 - Apr 2021

Percentage: 96.4

Secondary Education ,

Mana Bala Bharathi High School, Santhamaguluru, AP

Jun 2018 - Apr 2019

GPA: 10

SKILLS

Programming language : Python

Devops Tools: Docker, Git, GitHub Actions, Jenkins, Kubernetes

Cloud Platforms: AWS (EC2, IAM, S3, VPC)

Infrastructure as Code: Terra form (Basics)

Configuration Management: Ansible(Basics)

Operating System : Linux(Ubuntu), Shell Scripting

Certifications

- AWS Cloud Practitioner (in progress)
- Introduction to DevOps - Coursera
